Re: Letter of recommendation.

To whom it may concern,

I hereby express my support for and recommendation of Viktor Prokop regarding his professorship appointment process. Viktor and I have collaborated closely in recent years on publications, dissemination and outreach activities. To date, we have co-authored a book chapter and several scientific articles, and we are currently co-editing a new book for the Springer Sustainability and Innovation series. We have also organised a workshop in Pardubice and are both members of the Management Committee for the EU COST Action LIAISE.

During my time getting to know Viktor personally, I have recognised him as a highly hardworking and determined researcher. He is also an expert in fields that bridge regional economics with sustainability and the circular economy. His metrics to date are also impressive, with over 1,200 citations in Scopus and an h-index of more than 20.

At present, Viktor is the principal investigator of a project funded by the Czech Science Foundation. As part of this project, we co-authored a paper that was published in the prestigious journal Business Strategy and the Environment. In parallel, we are working on European project applications (like MSCA), and I really enjoyed our collaboration.

Viktor Prokop has my full support, as demonstrated above and in many other ways.

Please do not hesitate to contact me should you need more information

Sincerely yours,

Prof. Cali Nuur
The Head of the Department of Industrial Economics and Management
KTH Royal Institute of Technology
